CULTURE MEDIA

	ref. no.	packaging	volume
BGA For the selective isolation of <i>Salmonella</i> spp.	1360PD90	10 plates	90 mm
Buffered Peptone Water For the non-selective enrichment of bacteria, especially <i>Salmonella</i> spp. from food samples	3043BT225	bottle	225 ml
Cetrymide Agar For the isolation and identification of <i>Pseudomonas aeruginosa</i>	1310PD90	10 plates	90 mm
Chocolate Agar For the cultivation of a wide spectrum of fastidious microorganisms	1080PD90	10 plates	90 mm
CHROMagar Candida For the isolation and differentiation of <i>Candida</i> spp.	1400PD90	10 plates	90 mm
CHROMagar ECC For the isolation and enumeration of <i>Escherichia coli</i> and other coliform bacteria	1401PD90	10 plates	90 mm
CHROMagar Malassezia For the isolation and differentiation of <i>Malassezia</i> spp.	1407PD90	10 plates	90 mm
CHROMagar Mastitis For the isolation and differentiation of the main bacteria involved in mastitis infections (GP/GN)	2034PD90	10 plates	90 mm/2
CHROMagar Orientation For the isolation and differentiation of pathogens from different samples, especially from urine	1410PD90	10 plates	90 mm
CHROMagar Salmonella PLUS For the selective isolation of <i>Salmonella</i> spp., including <i>S. typhi</i> , <i>S. paratyphi</i> and lactose (+) <i>Salmonella</i>	1421PD90	10 plates	90 mm
CHROMagar Staph aureus For the selective isolation of <i>Staphylococcus aureus</i>	1404PD90	10 plates	90 mm
CHROMagar StrepB For the selective isolation of <i>Streptococcus agalactiae</i>	1007PD90	10 plates	90 mm
Columbia Agar + 5% Sheep Blood For the cultivation of a wide spectrum of fastidious microorganisms	1190PD90	10 plates	90 mm
Columbia Agar + 5% Sheep Blood + Gentamycin + Polimyxin For the selective isolation of bacteria with specific growth requirements	1194PD90	10 plates	90 mm
Columbia CAP Agar + 5% Sheep Blood For the selective isolation of Gram (+) cocci (with colistin and aztreonam)	1123PD90	10 plates	90 mm
Columbia CNA + 5% Sheep Blood For the selective isolation of Gram (+) bacteria (with colistin and nalidixic acid)	1191PD90	10 plates	90 mm

CULTURE MEDIA

	ref. no.	packaging	volume
Edwards Agar Modified + 5% Sheep Blood For the selective isolation of <i>Streptococcus agalactiae</i> and other <i>Streptococcus</i> spp. responsible for mastitis	1220PD90	10 plates	90 mm
Enterococcosel Agar For the selective isolation and differentiation of group D <i>Streptococcus</i>	1070PD90	10 plates	90 mm
Haemophilus Chocolate Agar For the selective isolation of <i>Haemophilus</i> spp.	1261PD90	10 plates	90 mm
MacConkey Agar + Crystal Violet For the isolation and differentiation of Gram (-) enteric bacilli	1020PD90	10 plates	90 mm
Mannitol Salt Agar For the isolation and differentiation of <i>Staphylococcus</i> spp.	1050PD90	10 plates	90 mm
Mueller Hinton II Agar For the susceptibility testing by the disk diffusion method	1051PD90	10 plates	90 mm
	1051PD140	5 plates	140 mm
Mueller Hinton II Agar + 5% Sheep Blood For the susceptibility testing of a wide spectrum of fastidious microorganisms by the disk diffusion method	1172PD90	10 plates	90 mm
MSRV Medium acc. ISO 6579 For the differentiation of <i>Salmonella</i> spp. on the basis of motility	3085BT100	bottle	100 ml
	3085BT200	bottle	200 ml
	3085BT500	bottle	500 ml
Nutrient Agar 1,5% For the cultivation of a wide spectrum of microorganisms	1503PD90	10 plates	90 mm
Sabouraud Dextrose Agar + Chloramphenicol For the selective isolation of fungi with inhibited bacterial growth	1231PD90	10 plates	90 mm
Sabouraud Dextrose Agar + Chloramphenicol + Gentamycin For the selective isolation of fungi with inhibited bacterial growth	1232PD90	10 plates	90 mm
Schaedler Agar + 5% Sheep Blood For the qualitative detection, isolation and cultivation of pathogenic, fastidious anaerobic bacteria	1200PD90	10 plates	90 mm
Schaedler KanaVanco Agar + 5% Sheep Blood For the qualitative detection and isolation of <i>Bacteroides</i> , <i>Prevotella</i> and other anaerobic Gram (-) bacteria	1207PD90	10 plates	90 mm
TSA + 5% Sheep Blood For the cultivation of a wide spectrum of fastidious microorganisms	1181PD90	10 plates	90 mm
XLD Agar For the selective isolation and initial identification of <i>Salmonella</i> spp.	1330PD90	10 plates	90 mm
0,9% NaCl Solution Suspension solution, dilution liquid	6149TB3	50 tubes	3 ml
	6149TB5	50 tubes	5 ml
	6149TB9	50 tubes	9 ml

A large group of brown chickens is the background of the page. Overlaid on the top left is a network diagram consisting of a large circle connected to three smaller circles by lines. The website address is written in red across the middle of the image.
